

THE SUPPLY CHAIN IS DYNAMIC AND CONSTANTLY CHANGING. YOUR SAFETY STOCK SHOULD BE TOO.

- ▶ Does your current strategy/tool allow you to vary safety stock based on varying demand?
- ▶ Can you easily change your safety stock goals?
- ▶ Can you identify where your safety stock is completely off your demand?
- ▶ Are you able to automatically manage Dynamic Safety Stock levels in JDE?

NEXINFO RECOGNIZES THE CHALLENGES ASSOCIATED WITH DEFINING AND MAINTAINING POWERFUL, MEANINGFUL SAFETY STOCK INVENTORIES.

To help users solve these challenges, we have created a streamlined Dynamic Safety Stock Solution for assessing your safety stock values and revising them without having to hire additional headcount!

NexInfo can leverage your existing JDE data to create tools enabling you to:

- ▶ Gather and analyze demand
- ▶ Readily identify exceptions
- ▶ Redefine safety stock goals
- ▶ Revise safety stocks without having to manually touch individual SKUs

Contact us to learn more about how our Dynamic Safety Stock solution can make your safety stocks relevant and effective!
